

Additional protection for Lone Workers with

Securitas

Thanks to our partners at Securitas, we are delighted to bring ATVTrac customers a new solution for those who work alone or have staff working remotely on location alone, with the 'Lone Worker Alarm' device solutions.

Much like our ATV Over function on ATVTrac, that notifies your chosen emergency contact should the machine be involved in a rollover incident, the Lone Worker Emergency devices offer this solution to workers when off their ATV or Side-by-Side, thanks to a simple push of a button should they get into difficulty and require assistance.

Provided in the UK via Securitas, the dedicated response team that ATVTrac utilise for tricky recovery situations, a choice of three devices is available to workers from as little as £26.59+VAT per month.
